

ValleySpeak Project Server

Introduction

ValleySpeak Project Server allows Project Managers to continue using Microsoft Project as their project management tool of choice, while allowing teams to publish, execute and control projects in real time.

Team Access To Microsoft Project Files

ValleySpeak Project Server lets you continue to use Microsoft Project for managing your schedules and projects, while at the same time giving your Team Members inexpensive and easy to use browser based access to project status. A much more affordable alternative to licensing copies of Microsoft Project for each of your Team Members, ValleySpeak Project Server lets team members view and update your schedule status through their browser, ensuring that they are always using the most current version of the schedule and eliminating the need to email Microsoft Project files around. Additionally since ValleySpeak Project Server uses the native Microsoft Project file, Team Members can report task status in real time, freeing up the Project Manager's time to focus on meeting desired project outcomes.

The screenshot displays the ValleySpeak Project Server interface. The top navigation bar includes 'Dashboard', 'Projects', 'Resources', 'Tasks', 'Calendar', 'Timesheets', 'Issues', 'Risks', 'Forums', 'Documents', 'Reports', and 'Preferences'. The main content area is divided into several sections: 'Alerts' (3 Approved Task(s) in Thermal Plant, 2 Overallocated Resource(s), 1 Approvals pending in Messages in Business, 1 New Document(s) in Business), 'Project Status Overview' (Projects: Business 5%, Product 21%, Construction 0%, Product development 50%, Project office 10%, Engineering 0%, Commercial construction 0%), 'Risks' (Probability matrix), 'Upcoming Milestones' (Business Position for Product Clarified: Tue 11/19/08, Scope complete: Wed 11/19/08, Decision point - go/no-go to development stage: Fri 11/20/08, Logistics complete: Fri 12/12/08), 'Forums' (New business... (milano)), 'Today's Top Resources' (paulmacy 2002, tomorino 1002, victoria 1002, milano 1002, smlt 1002), and 'Documents' (Business: New entity requirements, Proposed business model, Market research analysis, Commercial construction: Elevator plan). Below this is a Gantt chart for 'Commercial construction' showing tasks like 'Three-story Office Building (76,000 s...', 'General Conditions', 'Receive notice to proceed and sign co...', 'Submit bond and insurance documents', 'Prepare and submit project schedule', 'Prepare and submit schedule of values', and 'Obtain building permits' with their respective durations and dates.

Powerful Collaborative Tools

ValleySpeak Project Server gives you collaborative tools that facilitate browser based distributed project management. With capabilities like issue tracking, risk management, timesheet management, document management, calendar management, integrated reporting, discussion groups and a roles-based dashboard, ValleySpeak Project Server gives you capabilities far beyond what Microsoft Project alone provides, allowing you to use the files in a distributed collaborative environment with your team.

Alternative To Microsoft Project Server

ValleySpeak Project Server is an affordable alternative to Microsoft Project Server.

This screenshot shows the ValleySpeak Project Server interface with a different set of data. The 'Project Status Overview' section shows: Business 5%, Product 21%, Construction 0%, Product development 50%, Project office 10%, Engineering 0%, and Commercial construction 0%. The 'Risks' section shows a probability matrix. The 'Upcoming Milestones' section includes: Business Position for Product Clarified: Tue 11/19/08, Scope complete: Wed 11/19/08, Decision point - go/no-go to development stage: Fri 11/20/08, Logistics complete: Fri 12/12/08. The 'Forums' section shows 'New business... (milano)'. The 'Today's Top Resources' section lists: paulmacy 2002, tomorino 1002, victoria 1002, milano 1002, smlt 1002. The 'Documents' section lists: Business: New entity requirements, Proposed business model, Market research analysis, Commercial construction: Elevator plan. Below this is a Gantt chart for 'Commercial construction' showing tasks like 'Three-story Office Building (76,000 s...', 'General Conditions', 'Receive notice to proceed and sign co...', 'Submit bond and insurance documents', 'Prepare and submit project schedule', 'Prepare and submit schedule of values', and 'Obtain building permits' with their respective durations and dates.

Key Benefits

1. 100% Two Way Integration with Microsoft Project
2. Integrated Project Management, Issue Tracking, Risk Management, Discussion Forums, Document Management, Timesheet Management, Calendar Management and Project Reporting
3. Browser based software leading to lower Total Cost of Ownership
4. Roles based Dashboard covering the entire organizational portfolio
5. Approvals based workflow gives complete project management control
6. Collaborative tools for distributed team productivity
7. Your Microsoft Project files remain on your desktop so that you have full control of your files at all times

On Demand / On Site Deployment

ValleySpeak Project Server is available in both On Demand as well as an On Site deployment models. The On Demand (Hosted) deployment is ideally suited for organizations which have limited or no IT resources. The On Site version is suited for organizations who prefer to keep their data within their Local Area Network and have dedicated IT resources to install and maintain a server.

Pricing

On Demand	\$ 19.95 / User / Month
On Site	\$ 399.95 / User (Perpetual License)
